### TERMS OF ACCEPTANCE

When an individual or family seeks chiropractic care, and we accept a patient for such care, it is essential for both to be working towards the same objective.

Chiropractic has only one goal. It is important that everyone understands both the objective and the method used to attain it. This will prevent any confusion or disappointment.

#### Definitions:

**Health:** A dynamic state of wholeness in which your body can accurately perceive its constantly changing needs and respond appropriately in a timely manner. In short, *Health is the ability to adapt* to both internal and external stresses, whether they are physical, chemical, or emotional.

**Subluxation:** A disruption (interference) of the normal flow of information in the nerves between the brain and the cells of the body. This causes an alteration of the normal physiology and leads to a state of "dis-ease" (the inability of the body to adapt).

**Chiropractic Adjustment:** The specific application of a gentle force to facilitate the body's correction of subluxation and restore its innate healing processes so as to normalize function of the nervous system thus increasing the ability of the body to constructively adapt to its environment.

We do not offer to diagnose or treat any disease or condition other than subluxation. However, if during the course of your Chiropractic assessment, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnose or treatment for those findings, we will recommend that you seek the service of another health care provider.

Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. OUR ONLY PRACTICE OBJECTIVE is to eliminate a major interference to the expression of the body's innate wisdom. The only method used to accomplish this is the use of specific chiropractic adjustment to correct subluxation.

I,, have read and fully understand the above statements.  (Print Name)  All questions regarding the doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction.  I therefore accept chiropractic care for myself and on behalf of my family on this basis
